

**BART Agreement Number: 6M8124**  
**Work Plan No. B.06 - Benefit Cost Analyses**

**Approval Date: 9/22/17**

**Scope:**

The Scope of Services includes preparation of a Benefit Cost Analysis (BCA) using the FEMA approved methodology, for each of two separate projects:

- The Oakland Emergency Generator Project (Project No. 09EK300)
- Slope Stabilization and Erosion Control along A and C Lines

FEMA software, version 5.3.0, is the only software that may be used to conduct the BCA. Additional information on the BCA Toolkit is available at: <https://www.fema.gov/benefit-cost-analysis>. FEMA and the State of California require that sub-applicants include a completed BCA with project sub-applications on CD. BCAs must be in “.zip” file format when copied to CD. The work shall be performed in conjunction with the respect BART Project Managers and Grants Development professionals to identify and obtain the information needed to finalize the BCA.
